* Read more about Bags brick strength testing on our web pages—www.bagsco.com—or gives us a call.

These are Tough, Strong Bags

We loaded them up—7 masonry bricks— and toted them around the store. These bags didn't break, didn't tear and didn't split. Our arms got tired ... those 7 bricks weighed 25 pounds—but the bags held up. We've kept the bricks and the bag ... stop by and give them a test. We're sure you'll like these bags ... they are absolutely the best low cost T-Shirts we've found.

These bags are Made in the U.S.A.

And they're guaranteed ... if there is any problem with these bags, we will replace them at no cost.
